**Subject: Duke Energy Corporation – Marshall Steam Station
Marshall FGD Landfill (Permit Number 1809-INDUS)
Request for Operational Flexibility**

Dear Mr. Frost:

As discussed by telephone, Duke Energy requests permission for operational flexibility on weekends and holidays for Marshall Steam Station's Flue Gas Desulfurization (FGD) Landfill. On weekends and holidays when the Landfill Operator may be offsite but when the station wastewater treatment system remains operational, Duke Energy proposes the following:

- (1) The Landfill Operator shall place and compact all existing waste in the landfill prior to leaving the site;
- (2) The Landfill Operator shall clearly and visibly indicate the location for weekend clarifier sludge placement in the landfill through use of signs, barrels or other delineation aid prior to leaving the site;
- (3) Only designated station personnel who are properly equipped and informed shall transport and place clarifier sludge in the landfill during the weekend or holiday;
- (4) A certified Landfill Operator shall be available by phone to address issues should they arise during the weekend or holiday; and
- (5) On the first business day following the weekend or holiday, the Landfill Operator shall incorporate any clarifier sludge placed in the FGD Landfill during the weekend or holiday in accordance with the Operations Plan.

If you have any questions concerning this request, please contact me at (980) 373-3719.

Sincerely,

D. Edwin M. Sullivan SMD
