**RE: Autry LCID Landfill
Cumberland County, North Carolina
Permit to Construct and Operate a LCID Landfill
Facility Permit No. 26M-LCID**

Dear Elizabeth:

The Solid Waste Section (SWS) recently contacted Autry Grading for operating the LCID landfill without an engineer's certification of the disposal unit that it was constructed in accordance with the approved plans. Joyce Engineering submits this letter on behalf of Autry Grading for the required certification.

Attachment 2 - Conditions of Permit to Construct, Part I - Facility Specific Conditions, Item 3.a. states that "Written certification from a Registered Professional Engineer must be submitted to the Section certifying that the waste disposal unit(s) has been constructed in accordance with the approved plans."

The LCID Landfill Development Base Grading Plan incorporates the existing site conditions from the ceased mining activities. The sand mine conversion to a LCID landfill required no construction grading activities. Thus the landfill was permitted according to the existing conditions. To satisfy the Conditions of Permit to Construct, this letter is proved to the Section certifying that the waste unit was constructed in accordance with the approved plans.

If you have any questions please call or e-mail me at your convenience eandrews@joyceengineering.com or 336-323-0092.

Sincerely,
JOYCE ENGINEERING, INC.
