Re: Application Review
City of Durham Transfer Station
Durham County, Permit No. 32-12T, Document ID No. 12981

Dear Mr. Woody:

The Division of Waste Management, Solid Waste Section received your request for a permit modification for the City of Durham Solid Waste Transfer, Permit No. 32-12T on February 17, 2011. An invoice for the permit fee will be sent to you shortly.

Due to your planned start date, I proceeded with a review of the application and have the following questions/comments.

1. Please indicate specifically where on site the shingles will be collected and the approximate dimensions of the area. Will the shingles be unloaded onto a concrete pad or the ground?
2. Please describe what the attendant will do to ensure that only recyclable shingle materials are sent to GreenCycle. Based on the acceptance criteria of GreenCycle (Page 6, 3A), only shingles that have been sorted to remove deleterious materials will be accepted. GreenCycle does not have a solid waste permit that would allow waste sorting; therefore, it has to be done by transfer station personnel.
3. I am assuming that you will be required to complete the supplier form in the GreenCycle procedure (Page 17). It includes a list of certifications made by signing the form and requires a list of each residential address where the tear-off shingles were obtained. The proposed transfer procedure does not indicate how you will collect the necessary information.
4. The application did not include the Pilot Shingle Program agreement mentioned; therefore I was unable to determine if it addressed the questions listed.

Mr. Bruce Woody
