Congrats

I know you have been working hard for this. Make lots of money!

What you must document for the Section is regulated medical waste in the processing log.

The next time your permit is opened for an amendment or a modification I would like you to update your Ops plan to at least mention the pharmaceuticals operation.

Keep Growing

Larry

Subject: DEA Permit

Hi guys,

Just wanted to let you know that last month we got our DEA permit to process pharmaceuticals as a reverse distributor. We will start bringing in pharm on October 1. I assume this stuff will not be accounted for on our daily processing log for regulated medical waste unless it comes in as red bag (nonhaz drugs). We now have the DENR permit, EPA permit and DEA permit (state and federal). We are still working on getting our APHIS permit and I will advise when we get that one.

Look forward to seeing you guys when you are in the area and I can show you this amazing plant facility. We are GROWING!!!! All is going well on the medical waste side with no problems so far. Sending monthly report to Marcie at the landfill to keep her in the loop that the material being sent to her is properly sterilized.
