Ed,

We are doing the final design (construction drawings and specs) for what was permitted. The project was delayed due to the delay in closing North Wake Landfill. I understood the permit to be for 5 years, but needed to make sure.

Thanks,

John

What do you mean you are beginning the design stage??? Are you not building what you have a permit for?

Unless there is a provision in the permit that it is only effective for 18 months, a permit is valid for five years. Permits are subject to review every five years in accordance with the rules.

Ed,

Just following up on this request from last month. The City is funding this project and needs to have this information. Please call me at 833-7152 or email.

Thanks,

John

Ed,

Your office issued a PTC for Raleigh's Transfer Station on October 24, 2003 (Permit #92-33T). As you know, the City has not yet constructed the facility. We are beginning the design stage and wanted to confirm that the PTC was still in force. We had not made any changes to the approved drawings to date. There is no mention of expiration in the permit itself. If there is anything we need to do, just let me know.

John
