See attached. The facility is fairly small. Also very neat and tidy.

Killy's Tires Operation 2012 remains unchanged from the previous submittal in 2009.

Killy's Tires Operation

- 1. Collect tires**
- 2. Bring to warehouse**
- 3. Grade**
- 4. Sort**
- 5. Grove when necessary**
- 6. Paint when necessary**
- 7. Ship when quantity fills a container**
- 8. Specifics**

After sorting the tires, the tires are stacked seven tires high and no more than six feet high, in rows along the walls inside the warehouse per fire regulation codes and shown on fire regulation map. When the quantity reaches 250 - 300 tires, depending on size of shipping container, the tires are removed from the warehouse and placed in a shipping container and immediately shipped overseas. We only bring good and wanted tires to the warehouse at any time. Any tires that would be **unwanted** are taken directly to a state approved landfill and never arrive at the warehouse. The tires are collected **from** the county school bus garages in the 100 NC counties included in the contract with the state of NC. These tires are collected **when** a county school garage calls and **within** two weeks of that call **because** they request a pick-up. Any unwanted tires are taken to the landfill and any wanted tires are brought to the warehouse, sorted, stacked and shipped. **Operation hours** are from 8 AM till 3 PM and available upon request from county school garage. **Personnel on site** include Jesus Fernandez when not collecting tires, in order to sort and stack the tires. Occasionally a sub-contractor is brought in for a couple of hours to help load a container. **During a normal working day**, tires are sorted, stacked and when quantity reaches 250-300 removed to container and shipped. When not sorting and stacking and shipping, I am collecting tires from the NC school bus garages to bring to a landfill or back to the warehouse to sort and stack and ship.

- A letter stating that this use complies with local zoning from the unit of local government having zoning authority over the site has been provided.
- A letter from the local fire protection authority accepting the responsibility for fire protection services for the site has been provided.
- Documentation of the operator's ability to meet the financial responsibility requirements has been provided.
- Scrap tires collection site meets the operational requirements NFPA 231D-1986.
- Fire safety survey has been conducted.
- Communication equipment is maintained on site.
- An emergency preparedness manual is on site.
- A list of emergency contact numbers is on site.
- A list of emergency response equipment is on site.
- A description of the procedure for emergency evacuation is on site.

Killy's Tires

Housekeeping

Junk tires should be stored in southwest corner near office. Bring junk tires to the landfill when reaching a maximum of 50 tires.

Throw all trash in trash bins. Trash should be brought to the landfill on every Friday and as needed when bins are full.

Mow and weed-whack outdoor grass areas when the grass is 8 inches.

Sweep floors daily and as needed.

Keep supplies in office orderly and papers organized.

Person responsible for cleaning and maintaining all area is Jesus Fernandez.
