RE: Correction of Violation
J.S. Turner Sawmill Structural Fill Project
Halifax Co.

Dear Mr. Morrison:

This is written to inform you that the violations of 15A North Carolina Administrative Code 13B specified in a Warning Letter issued to you and dated June 20, 2001, appear to have been corrected. These violations occurred at the J.S. Turner Sawmill Structural Fill Project located on the Job S. Wommack property in Weldon. This determination was based on my site inspection conducted on August 2, 2001, and by engineering data submitted by Mr. E.B. Grant, P.E. with the Plumblin Corp to the Division. This data was reviewed by engineers with the Permitting Branch of the Division and is believed to accurately describe the footprint of the ash, the final slopes and contours of the fill area. The submitted information also supports the conclusion that the required two feet separation between the fly ash fill and the seasonal high water table has been met.

Please be advised that this approval letter does not relieve any of the responsible parties from any future actions that might be taken by the Division for violations found to result from the fill operation.

Mr. Morrison
