Re: Permit Modification
SWCD-60-02

Dear Mr. Grosswald:

The Division of Waste Management, Solid Waste Section, has reviewed your request to add two aerated static piles which will be contained in two steel containers each 12' x 8' to your compost demonstration approval. These additions are approved for a five month trial period to your existing compost demonstration facility, permit number SWCD-60-02. Your request to add these two aerated static pile bins and the manner in which they will be managed is considered approved with the understanding that only existing feedstocks listed under your current demonstration permit are being managed.

The permit modification is effective upon receipt of this letter. If you have any questions please feel free to contact Tony Gallagher at 919-707-8280.

Sincerely,

Michael E. Scott, Chief
Solid Waste Section
