Re: December 2013 Assessment Monitoring Report
Old Salisbury Road Landfill (No. 34-12)
Forsyth County, North Carolina
HDR Project No. 00162-218490-018

Dear Ms. Drummond:

Representatives of HDR Engineering, Inc. of the Carolinas (HDR), the City/County Utility Commission (Owner) and your office met on February 4, 2014 to discuss the latest results of groundwater assessment at the Old Salisbury Road landfill and the completed baseline study. We found the meeting to be very informative and productive.

Based on that meeting, HDR proposes on behalf of the owner, that the assessment monitoring program continues at the site in the following manner:

- Monitoring wells MW-1R, MW-2R, MW-4R and MW-15 will be sampled semiannually for Appendix I constituents and those additional constituents in Appendix II that have been detected in the last two years.
- Monitoring wells MW-1R, MW-2R, MW-4R and MW-15 will be sampled during every other fall event for the entire Appendix II constituent list. The next event for this would occur in fall of 2015. Additional Appendix II constituents detected will be added to the sampling program for subsequent semiannual events.
- All of the other site wells and surface waters will continue to be sampled semiannually for the full appendix I list of constituents.
- Evaluate this program again when a change in the status of detections occurs, but not later than in 2019.
