Re: Notification of Site Suitability
Anderson Creek C&D Landfill
Phase III Expansion
Harnett County
DIN #19384

Dear Mr. Bader:

The North Carolina Solid Waste Section (Section) has completed its review of the site study, entitled;

Geologic and Hydrogeologic Report for Construction and Demolition Phase III Landfill Expansion (DIN 18757) for the Anderson Creek C&D Landfill. Prepared for: Harnett County General Services. Prepared by: CT Clayton, Sr., P.E., Inc. Coats, NC. March 21, 2013

The above referenced application has met the requirements outlined in 15A NCAC 13B .0538(a). The Section hereby notifies Harnett County (owner) that the approximate 5 acre expansion area at the Anderson Creek C&D Landfill, located in Harnett County is suitable for development as a solid waste management facility. Harnett County is authorized to prepare an application for a Permit to Construct.

The Permit to Construct application shall be prepared in accordance with 15A NCAC 13B .0537, .0538(b), and .0539 through .0544, which includes a facility plan, an engineering plan, a construction quality assurance plan, an operations plan, a closer and post-closure plan (including Financial Assurance) and monitoring plans for groundwater, surface water and landfill gas and shall address Phase III expansion of the landfill development. The Permit to Construct Application should be in general accordance with the conceptual plan shown in the Site Suitability Study listed in the approved documents referenced above. The Section will approve a specific disposal area only after reviewing the Permit to Construct Application's Facility Plan as required by the Rules.

Solid Waste Management Rule .0201 requires the Section to issue a solid waste permit in two (2) parts. The first part being the Permit to Construct and the second part, a Permit to Operate. This letter is not a permit. This letter only informs the applicant that they may proceed with their permit application. The final action that the Section may take on a permit application is the issuance or denial of a permit.

If you have any questions or concerns, please contact Mrs. Elizabeth Werner via email elizabeth.werner@ncdenr.gov or phone (919) 707-8253.

Sincerely,

Edward F. Mussler, III, PE
Permitting Branch Supervisor
