DIRECTOR

Ref: Haywood County MSWLF Site Study

Mr. Horton:

The Division of Waste Management, Solid Waste Section (Section) has been reviewing the Site Study for the proposed Haywood County MSW Landfill (White Oak). The major issues concerning the site hydrogeologic characterization and the resulting landfill footprint configuration have been recently resolved between your consultant (Municipal Engineering) and the Section's geologist (Matt Gamble).

The resolution of the preliminary footprint configuration and resulting revisions in estimated volumes, capacities, phasing, and related items should be revised throughout the submitted site study.

Please provide the revisions in accordance with North Carolina Solid Waste Management Rule 15A NCAC 13B .1603(b).

Section IV

US Army Corps of Engineers wetlands permit has not been forwarded for inclusion in the site study (as indicated in the existing submission).

Section V

Landfill capacity and soil calculations presented in Section 5.3 are based upon the initial footprint. The revisions to the footprint and phasing have likely changed the information presented in this section. Please review this section and provide updated data that reflects the revised design.

Section 5.5 is based upon the initial footprint design and phasing. Please revise this section to reflect the final footprint and phasing.

Appendix B

No related correspondence was submitted for inclusion in appendix B. It appears that all pertinent correspondence for this site study is included.

AN EQUAL OPPORTUNITY / AFFIRMATIVE ACTION EMPLOYER - 50% RECYCLED/10% POST-CONSUMER PAPER

various other sections of the submission. Please confirm that no additional correspondence is intended for this section.

Appendix C

Appendix C contains the various preliminary design drawings for the proposed landfill based upon the initial design. Provide updated drawings that reflect the revised footprint and phasing (drawings E1, E2, E3, and E4).

Appendix F

Additional investigations and information has been submitted in the October 21, 1999 and February 11, 2000 submissions. Please update the hydrogeologic narrative contained in beginning of this section

Revise tables to reflect revised information.

Revise plates 1, 4, 5, and 5A to reflect the revised footprint.

In the February 11, 2000 Submission, revise plates 1 and 4A to reflect the revised footprint.

The Section reserves the right to request additional information during the continuing review. If additional information is required, you will be notified by the Section.

Should you have any questions concerning this review, please contact me at (919) 733-0692 extension 266 or Matt Gamble at extension 344.

Thank you,

William D. Sessoms, PE
