Re: Issuance of Permit to Construct
Maysville C&D Recycling and Recovery Facility
Jones County, North Carolina
Permit No. 5202-TP-2012
Doc ID No. 18598

Dear Mr. Maides:

Attached is the above referenced Permit to Construct. You should carefully review the permit and the North Carolina Solid Waste Solid Waste Rules (attached) addressing your facility.

The following items should be of special concern to you and are contained in Attachment 2 of the Permit to Construct:

1. The Permit to Construct does not authorize the facility for operation until you demonstrate that the facility has been constructed in accordance with the approved plans and the NC Solid Waste Rules.
2. Prior to operation, you will need to acquire and maintain Financial Assurance as stipulated in Attachment 3 Part I Item 4.
3. In addition, you will need to acquire all other permits, licenses and authorizations necessary to properly operate the facility and maintain those permits, licenses and authorizations current during the term of the Permit to Operate.

When facility construction is completed in accordance with the permit to construct, you must arrange with Ray Williams, Environmental Senior Specialist for the facility, at (252) 948-3955, to arrange a site inspection with you. You must demonstrate and provide written certification during the site inspection that the facility was constructed in accordance with the permit and approved documents.

Thank you for your cooperation during the permitting process. If you have questions about the permit conditions or questions arise during construction, please contact either me at (919) 707-8252 or Ray Williams at the telephone number referenced above.

Sincerely,

Geoffrey H. Little
Environmental Engineer II
