Re: *Groundwater Assessment*  
North Mecklenburg C&D Landfill – Infill Area  
Mecklenburg County, Solid Waste Permit Number 60-13  
DIN 20451

Dear Mr. Griffin:

The Solid Waste Section has completed a review of the *Semiannual Monitoring Report* dated December 12, 2013 (DIN 20328) and submitted on your behalf by Enviro-Pro, P.C. In response to a confirmed vinyl chloride exceedance within the groundwater monitoring wells at the facility, additional groundwater monitoring wells were installed and sampled as part of the first phase of the groundwater assessment for the Infill Area. The groundwater monitoring wells were sampled on October 9, 2013, and a confirmatory sampling event was conducted on November 19, 2013. The sampling events confirm both shallow and deep groundwater contamination at the facility.

As a result, *within 45 days of receipt of this letter*, please submit a second phase Groundwater Assessment Work Plan (Contaminant Delineation Work Plan) for the Infill Area including a timeline and schedule for Solid Waste Section approval to further characterize the nature and extent of the groundwater contamination in accordance with 15A NCAC 13B .0545.

If you have any questions or concerns regarding this letter, please feel free to contact me at 919-707-8294 or by email at [jaclynne.drummond@ncdenr.gov](mailto:jaclynne.drummond@ncdenr.gov). Thank you for your continued cooperation with this matter.

Sincerely,

Jaclynne Drummond  
Compliance Hydrogeologist  
Solid Waste Section
