## Review of Permit Application Meeting

Permit No.	7407-CDLF-2009 7407-CDLF-2001 (Phase 1)
Permit Name	C&D Landfill
Owner	C&D Landfill, Inc.
Address	802 Recycling Lane Greenville, NC 27834
Owner	Judson Whitehurst
General Manager	Wayne Bell
PE/PG	David Garrett

Pat Backus, the permitting engineer, and Elizabeth Werner, the permitting hydrogeologist, met with David Garrett on July 2, 2014, and reviewed comments and questions about the application based on their review to date. Below are notes from the meeting.

Minor comments addressed checking references to tables, sections, drawings, etc. to ensure they are correct. Most comments/questions about operations related to the proposed processing at the landfill to recover materials that can be used rather than disposed. The scope of the processing operation needs to be more clearly defined. Also operations at the transfer station shouldn't be included in the landfill operation plan unless it involves the landfill. In those cases, it should be clear if the operation is at the transfer station or landfill.

It was unclear whether the water quality monitoring plan and landfill gas monitoring plans were the most recent issued. This will be checked.

It was stated that the facility intends to change the scope of the permit to construct application from construction of the entire Phase 2B to smaller to portion of the cell.

It was noted that PACA costs need to be included in the financial assurance estimate.

There was also a question about whether there should be one permit rather than two. Pat will review this with Ed and section staff. Pat will ensure that Elizabeth has a copy of the water quality monitoring and landfill gas monitoring plans that were submitted as part of the application package.

David will make changes to the application based on the discussion and submit the revision for review. Electronic and paper submissions will be needed.

Pat Backus
