Re: Revised Final Cover Grading Plan
Currin Bothers Sunset Lake Road LCID Landfill
Permit No. 92-N, Wake County, DIN 20905

Dear Mr. Currin:

The Division of Waste Management, Solid Waste Section (Section) received and reviewed your request for a modification to the final cover grading plan. The plan was submitted on your behalf by Smith Gardner and received by the Section on December 23, 2013 (DIN 20904). In addition, Smith Gardner met with the section and discussed the changes proposed.

The modified grading plan incorporates slopes greater than 3H: 1V which were approved when the landfill was under the jurisdiction of Wake County. Contours were modified so that these areas would blend with the closure slopes for currently active areas which must comply with the slope limits for LCID Landfill stated in Rule .0565. In addition, modifications to the landfill footprint were made based on updated stream and wetland delineation.

The Section has reviewed the request and finds the modification acceptable. However, due to recent events, the Section has not completed the administrative processing of the application. Due to your immediate need, the Section is granting temporary approval of the modification while the administrative processing is completed. This processing, which includes payment of a permit modification fee, must be completed within 30 days or the approval will be rescinded.

If you have any questions, please contact Pat Backus at (919) 707-8257 or by email at pat.backus@ncdenr.gov.

Sincerely,

Edward F. Mussler, III, P.E., Permitting Branch Supervisor
Division of Waste Management, NCDENR
