

ROY COOPER

Governor

ELIZABETH S. BISER

Secretary

MICHAEL SCOTT

Director

NORTH CAROLINA
Environmental Quality

Scrap Tire Stockpiles and Landfills

- Scrap tire stockpiles may become breeding sites for mosquitoes and home to other pests.
- They are a potential fire hazard and can contaminate surface water runoff.
- In March 1990, North Carolina banned scrap tires from disposal in landfills.
- Scrap tires disposed of in landfills will not decompose for many years and tend to rise through the landfill to the surface damaging the protective cover.

To Help Prevent Pollution

- Encourage customers to maintain proper air pressure in tires, to periodically rotate and balance tires, and to periodically check front end alignment.
- Prevent unnecessary tire changeouts. Educate employees and customers as to the techniques for determining the reasons tires should be replaced.
- Seek opportunities to reuse or retread discarded tires.
- Recycle scrap tires. Whole scrap tires can be used for retaining walls, dock buffers, or playground equipment. Scrap tires can be processed for door and gymnasium mats or used for erosion control.
- Counties may accept scrap tires from other counties but not from out of state.

The Wrong Things to Do

- Do not commingle whole scrap tires with regular waste that will be landfilled.
- Do not illegally dump scrap tires.
- Do not stockpile scrap tires long enough for mosquitoes to breed.
- Do not give scrap tires back to car owners unless requested. While this practice is not illegal, the scrap tires could be wrongfully disposed.

Hauling Scrap Tires

- Use only a registered scrap tire hauler to transport your tires to scrap tire collection sites and/or scrap tire processors and retread companies.
- If you use a hauler to pick up your scrap tires, you must complete a Scrap Tire Certification Form (attached). Call the scrap tire collection site to verify arrival of your scrap tires.
- If you haul your own scrap tires, take them to scrap tire collection sites permitted by the state. Each county in North Carolina is required to have at least one scrap tire collection site. There are also several landfills and processing plants permitted to accept scrap tires.

Applicable Laws

- Since October 1993, North Carolina has imposed a 2-percent tax on all tires sold with a bead diameter of less than 20 inches and a 1-percent tax on tires with a bead diameter of 20 inches or greater.
- All persons involved in the disposal of scrap tires must complete and sign a Scrap Tire Certification Form, which is accessible on our website or available at a county collection site.
- Part I is filled out by the person who has generated the scrap tires.
- Part II is filled out by the certified hauler or retailer hauling its own scrap tires.
- Part III is filled out and retained by the receiver of the scrap tires.
- No person shall discard, deposit, or dispose of a scrap tire except at a site or facility permitted to receive scrap tires. It is the legal responsibility of the scrap tire generator to ensure that a certified hauler or the retailer disposes of scrap tires at a permitted facility.
- The facility should be specified when the generator fills out Part I of the Scrap Tire Certification Form.
- Prevention of a nuisance: A maximum of 500 scrap tires may be stored on the premises of a retail business where tires are sold and/or removed.
- When scrap tires are hauled from the generator, count the number of scrap tires and enter that number under Part I of the Scrap Tire Certification Form. Do not leave the number blank as additional scrap tires could be added to your load and disposed of under your name.
- Commercial scrap tire haulers must be registered by the Division of Waste Management - Solid Waste Section and obtain a hauler's ID Number.
- Tire retailers who haul only their scrap tires generated in the normal course of business are not required to obtain a hauler's permit. The retailer's state sales tax number serves as the ID number.

§ 130A-309.58. Disposal of scrap tires.

(f) Every tire retailer or other person disposing of scrap tires shall complete and sign a certification form prescribed by the Department and distributed to each county, certifying that the tires were collected in the normal course of business for disposal, the county in which the tires were collected, and the number of tires to be disposed of. This form also shall be completed and signed by the tire hauler, certifying that the load contains the same tires that were received from the tire retailer or other person disposing of scrap tires. The tire hauler shall present this certification form to the tire processor or tire collector at the time of delivery of the scrap tires for disposal, collection, or processing. Copies of these certification forms shall be retained for a minimum of three years after the date of delivery of the scrap tires.

§ 130A-309.59. Registration of tire haulers.

(a) Before engaging in the hauling of scrap tires in this State, any tire hauler must register with the Department whereupon the Department shall issue to the tire hauler a scrap tire hauling identification number. A tire retailer licensed under G.S. 105-164.29 and solely engaged in the hauling of scrap tires received by it in connection with the retail sale of replacement tires is not required to register under this section.

(b) Each tire hauler shall furnish its hauling identification number on all certification forms required under G.S. 130A-309.58(f). Any tire retailer engaged in the hauling of scrap tires and not required by subsection (a) of this section to be registered shall supply its merchant identification number on all certification forms required by G.S. 130A-309.58(f).

§ 130A-309.62. Fines and penalties.

Any person who knowingly hauls or disposes of a tire in violation of this Part or the rules adopted pursuant to this Part shall be assessed a civil penalty of fifty dollars (\$50.00) per violation. Each tire hauled or disposed of in violation of this Part or rules adopted pursuant to this Part constitutes a separate violation.

Scrap Tire Certification Form

North Carolina Department of Environmental Quality Division of Waste Management – Solid Waste Section

This form is to be used for free disposal of scrap tires. Scrap tires that did not originate in the normal course of business in North Carolina do not qualify for free disposal. Submit one (1) form for each location that scrap tires are picked up from.

Part 1 – Scrap Tire Generator:

Business name: _____, Contact name: _____

Physical address: _____

Phone number: _____

Number of scrap tires collected for disposal: _____

Scrap tires collected from (month, day, year): _____, to (month, day, year): _____

County in which the scrap tires were collected: _____

By signing this form, you certify that the scrap tires originated in North Carolina in the normal course of business for disposal:

Signature: _____, Date: _____

Part 2 – Scrap Tire Hauler:

Business name: _____, Contact Name: _____

Physical address: _____

Phone number: _____

Scrap tire hauler vehicle make, license plate number, and state: _____

Number of scrap tires received from the scrap tire generator
(the same number as listed in Part 1, unless usable tires were removed): _____

Scrap tire hauler ID number: _____

Merchant ID number (applicable to tire retailers that are not registered haulers): _____

By signing this form, you certify that the load contains the same scrap tires received from the scrap tire generator as specified in Part 1:

Signature: _____, Date: _____

Part 3 - Scrap Tire Collector, Processor, or Disposer:

Local government/business name: _____

Number of scrap tires received: _____

Signature of responsible party: _____, Date: _____

As stated in NCGS 130A-22, a person who violates rules adopted by the Commission pursuant to Article 9 is subject to an administrative penalty of up to \$15,000 per day and, as stated in NCGS 130A-26.2, falsifying information on this form is a Class 2 misdemeanor subject to a \$10,000 fine.

Instructions:

Part 1:

- Is to be filled out by the scrap tire generator.
- Shall contain an original signature.
- Only the scrap tire generator shall fill in the information.

Part 2:

- Is to be filled out by the scrap tire hauler.
- Ensure the scrap tire hauler identification number is listed.
- A tire retailer may use its merchant identification number in place of a scrap tire hauler identification number if it solely hauls scrap tires received by it in connection with the retail sale of replacement tires. The tire retailer is then not required to register as a scrap tire hauler.
- Only scrap tires received from the generator, as specified in Part 1, shall be brought for disposal. If usable tires are removed, enter the lower number of scrap tires received.
- Shall contain an original signature.
- Only the scrap tire hauler shall fill in the information.

Part 3:

- Is to be filled out by the scrap tire collector, processor, or disposer.
- Shall be signed or stamped.
- Only the scrap tire collector, processor, or disposer shall fill in the information.
- The scrap tire certification form shall be retained for a minimum of three years.
- A scrap tire certification form is not required for up to five scrap tires brought for disposal by someone other than a scrap tire collector, scrap tire processor, or scrap tire hauler.
- A scrap tire that originates within any county in North Carolina and accompanied by this completed form shall be provided free disposal.
- The fee for disposal of a non-qualifying scrap tire shall not exceed the cost of disposal.
- The county/unit of local government is encouraged to audit scrap tire generators.
- The county/unit of local government is responsible for managing its scrap tire program and the cleanup of scrap tire stockpiles and dumps within its boundaries.
