Subject: Permit to Construct/Permit to Operate – Original Issuance
Permit No. 1119-INDUS-2020, Duke Energy Asheville Steam Electric Plant
Buncombe County, FID 1389250

Dear Ms. Allison:

Enclosed you may find copy of Permit No. 1119-INDUS-2020, dated February 7, 2020 (FID 1360595). This permit is the original issuance of the Permit to Construct and Permit to Operate an industrial landfill at the Duke Energy Progress, LLC (the Permittee) Asheville Steam Electric Plant in Buncombe County. Please make note of the following:

- Read your permit carefully and thoroughly; should you have any questions, contact me immediately.
- Since this is an original permit issuance, the permit requires recordation. Enclosed is a certified original copy of the permit. It is important that the certified original permit be recorded at the Register of Deed in Buncombe County. It should be indexed in the grantor index under the name of the land owner. The certified original should be affixed with the Register's seal, date, book number and page number of recording. A certified original copy of the permit with the Register's information affixed should then be returned to me at the address shown at the bottom of this page. The purpose of this recordation is to notify potential future buyers that a solid waste management facility existed on the property, in accordance with North Carolina General Statutes.
- All the documents related to this permit may be viewed and downloaded at: <https://edocs.deq.nc.gov/WasteManagement/Browse.aspx?id=732019&dbid=0&repo=WasteManagement>
- The Permittee is required to maintain copies of this permit, the approved plans, and all records at the facility and to make them available to the Solid Waste Section upon request during normal business hours.

Please do not hesitate to contact our office with any questions or requests for assistance.

Sincerely,

David Giachini, P.E., Permitting Engineer
Permitting Branch, Solid Waste Section
Division of Waste Management, NCDEQ
